

Whispering Seed

Summer 2026

Despite another challenging year in Myanmar, Whispering Seed continues to grow and expand our impact. Thanks to your generous support, we have strengthened both of our training centres, increasing our impact and empowering more local youth and educators from across the country.

Building capacity for teachers & youth

At **Sprouting Seeds**, we have been able to grow our 3-6 month residential internship program equipping young people with vital life and vocational skills training; providing free accommodation, training, and practical skills that build confidence and future opportunities.

At **Whispering Earth**, donor funding enabled us to install a large solar power system, bringing reliable electricity to the entire training centre. This is a major milestone that allows us to host larger groups and extend the length of our trainings.

Over the past six months, we have also delivered several teacher and youth leadership practical skills trainings for participants from across Myanmar, alongside our flagship three-month internship program. None of this would have been possible without your generosity.

Thank you for investing in the lives of Myanmar's young people and helping us continue this work during such difficult times. Your kindness and contributions directly transform lives and sustains our community.

-Whispering Seed Family
